

RIGHT ON LIBRARY AUTOMATION SOFTWARE

For more than 30 years, the AFFORDABLE ALTERNATIVE™ in automation software for libraries and libraries in schools, churches, synagogues, offices, and homes.

COMPUTER ACCESS CATALOG SYSTEM

A complete library catalog on the computer!

The **COMPUTER ACCESS CATALOG SYSTEM** is affordable, easy to learn and use and allows you to make so much better use of your time. The templates on the screen ask for all the information needed. Just type in the information. Making corrections and fixing mistakes is done at the touch of a key.

Enter all library holdings quickly and easily. No programming required, it's all right on the screen. Fill in the information. That's it!

COMPUTER ACCESS CATALOG SYSTEM creates on-screen reports so both staff and patron can quickly and easily locate the desired information and materials. For the staff it automates and simplifies repetitive library tasks.

The **COMPUTER ACCESS CATALOG SYSTEM** operates on flexible Windows '98, '2000, XP, XP PRO, VISTA, WINDOWS 7 PRO, WINDOWS 7 ULTIMATE and NT. Single user and network versions are available making the program perfect for the smallest or largest library.

PERFECT FOR PATRONS AND LIBRARIANS

Search by all parts of the entry (i.e., author, title, subject, call # and all others)

Search for any words in any of those fields

Search and find ANY word in the notes field

Print reports with ease.

Read bar code labels using a scanner (no programming necessary).

May also be used as an Acquisition program.

PRINT complete reports on screen or paper of all holdings, by author, title, call # or ID#. Print the entire catalog or any part you choose. Print labels for spine, book cards and pockets. Create these reports through the Windows reports manager and print through the Windows printer driver.

COMPARE this high quality, high performance software package with other systems costing 5 - 10 times more. Compare ease of installation, learning, and use.

CONSIDER the joy of calling our office and hearing a human voice. Consider the features the program offers. Consider the instructions; written by a librarian and as easy to read and use as the program.

EASY for volunteers to enter data. **EASY** for patrons of all ages to search and find the material they want.
